Author(s) : [THOMPSON, J. W.](#)

Book : [Agric. Hist. Ser. U.S. Dep. Agric.](#) 1942 No.5 pp.viii + 182 pp.

Abstract : The subject matter of this publication is largely drawn from contemporary agricultural and other writings of the period under review, from which numerous quotations are made in the text. The period dealt with covers the development of the American livestock industry from the early colonial days to the establishment of the extensive, ranching type of livestock raising, which held sway for a further 20 years about 1880.

The history of animal husbandry, as described in this report, is closely integrated with the history of the American livestock industry.

general pattern of American development to 1860. In the acquisition and settlement of each frontier, livestock played a unique and vital role, providing the pioneer with transportation, food, draft power, and economic enterprises.

It is perhaps surprising that there is little reference to animal disease and its course of livestock development and expansion.-N. J. SCORGIE.
