Abstract : This book was originally written as a text for animal science and veterinary students in the USA. As it came also to be used by veterinary students and veterinarians, the third edition was devised to be of greater value to these users. It is of interest to a wide range of reader, but without compromising the simplicity of the earlier editions. Material is given to cattle and the horse, but sheep, goats and pigs, and in some instances to other animals.

are mentioned where important differences from the horse or cow exist. Five chapters deal with reproductive anatomy and physiology, and two with the mammary gland and lactation. J.D. Turton<new para>ADDITIONAL ABSTRACT:<new para>The 2nd edition of this student text has been altered to make it of more value to veterinary students and practitioners without sacrificing its clarity and simplicity. General anatomy and physiology are discussed with emphasis on the horse and cow. Chapter 3 (pp. 454-461) deals with the anatomy of the mammary gland and Chapter 3 (pp. 471) discusses the physiology of lactation. The 2nd edition of this book was published by DSA 38, 307.
