## Abstract

Structural Funding and Employment in the European Union combines an interdisciplinary approach with coverage of all the structural funds including the European Regional Development Fund, the European Social Fund, the European Agricultural Guidance and Guarantee Fund (Guidance Section) and the Financial Instrument for Fisheries Guidance. Empirical evidence is presented for the effectiveness of these funds and their success in increasing economic growth in certain areas and employment in others. The book also covers the relationship of these funds with the European Coal and Steel Community, the European Investment Bank and the Cohesion Fund.
