Abstract

We explore the implications of SU(3) flavor symmetry in the soft handbag mechanism for two-photon annihilation into pairs of pseudoscalar octet mesons. In this approach we obtain a good description of the experimental results for all measured channels at high energy, with two complex form factors adjusted to the data. We also predict the cross section for

$\hat{1}^3\hat{1}^3\hat{1}^+\hat{1}^+\hat{1}^0$.
