Use and Abuse of Reusable Learning Objects

Pithamber R. Polsani

Abstract

The term Learning Object, first popularized by Wayne Hodgins in 1994 when he named the CedMA working group "Learning Objects", has become the Holy Grail of content creation and aggregation in the computer-mediated learning environment. Unfortunately, Learning Objects (LOs) and Reusable Learning Objects are frequently employed in uncritical ways, thereby resulting in a serious lack of conceptual clarity and reflection is evident in the multitude of definitions and uses of LOs. This paper assesses current definitions of the term Learning Object, to articulate the foundational principles for developing a methodology and broad set of guidelines for creating LOs.
