Helminths, arthropods and protozoa of domesticate

Author(s) : [Soulsby, E. J. L.](#)

Author Affiliation : Department of Clinical Veterinary Medicine, Cambridge University, United Kingdom.

Book : [Helminths, arthropods and protozoa of domesticated animals](#). 1982 No.1
809 pp.44 ref.many

Abstract : This is first major revision since 1968 of this standard textbook of great importance to veterinary medicine, which is designed both to serve the needs of the student and as a reference book for practising veterinarians. This edition incorporates the latest knowledge of the morphology, physiology and biology of helminths, arthropods and protozoa.

protozoa affecting domesticated animals and of the pathophysiology and in host responses to them. In view of the changing character of livestock husbandry farming both in the developed and developing countries, the subject is dealt on an international basis. The numerous additions include parasites of fish, laboratory exotic and zoo animals, the epidemiology and forecasting of parasitic diseases, information on pathophysiological processes, immunological aspects of parasitology of the parasites in their hosts. The section on arthropods (pp. 359-500) contains entries on the following orders: Orthoptera, Mallophaga, Anoplura (Siphonaptera), Hemiptera, Coleoptera, Siphonaptera, Diptera and Acari, as well as information on pentastomids, parasitic copepods and injurious non-parasitic arthropods such as biting, stinging and urticating species.
