Abstract

The vibrational OH-stretch spectrum of size selected water hexamer clusters has been measured at 40 and 60 K. By comparison with temperature dependent calculations the spectra were assigned. This result is in good agreement with recent predictions of the equilibrium isomer of water hexamers.

Detection of the book isomer from the OH-stretch spectroscopy

C. Steinbach, P. Andersson, M. Melzer, J. K. Kazimirski, U. Buck and V. Buch, *J. Chem. Phys.* 2014, 140, 124301
DOI: 10.1039/B400664J

If you are not the author of this article and you wish to reproduce material from this article, you must [formally request permission](#) using RightsLink. Go to our [Instructions for authors](#).

Authors contributing to RSC publications (journal articles, books or book chapters) must obtain permission to reproduce material contained in this article provided that the copyright is not reproduced material.

Reproduced material should be attributed as follows:

- For reproduction of material from NJC:
Reproduced from Ref. XX with permission from the Centre National de la Recherche Scientifique and the Royal Society of Chemistry.
- For reproduction of material from PCCP:
Reproduced from Ref. XX with permission from the PCCP Owner Society.
- For reproduction of material from PPS:
Reproduced from Ref. XX with permission from the European Society for Physical Chemistry, the European Chemical Association, and The Royal Society of Chemistry.
- For reproduction of material from all other RSC journals and books:
Reproduced from Ref. XX with permission from The Royal Society of Chemistry.

If the material has been adapted instead of reproduced from the original RSC publication, the word 'reproduced' should be substituted with "Adapted from".

In all cases the Ref. XX is the XXth reference in the list of references.

If you are the author of this article you do not need to formally request permission to reproduce material contained in this article in third party publications or in a thesis or dissertation, provided that the permission is given with the reproduced material.

Reproduced material should be attributed as follows:

- For reproduction of material from NJC:
[Original citation] - Reproduced by permission of The Royal Society of Chemistry, the Centre National de la Recherche Scientifique (CNRS) and the RSC
- For reproduction of material from PCCP:

- [Original citation] - Reproduced by permission of the PCCP Owner Soci
- For reproduction of material from PPS:
[Original citation] - Reproduced by permission of The Royal Society of Cl
Society for Photobiology, the European Photochemistry Association, and
- For reproduction of material from all other RSC journals:
[Original citation] - Reproduced by permission of The Royal Society of Cl

If you are the author of this article you still need to obtain permission to reproduce publication with the exception of reproduction of the whole article in a thesis
