Abstract

ABSTRACT

This paper examines the security management for prevention
University libraries with Benue State University Library, Maku
serving as a case study. The aim of the study was to identify th
mutilation in University libraries and how to curb and preserv
this information resources in the library. The survey research
Questionnaire are the main instrument for data collection. Fr
percentages is the main statistical tools used for data analysis.
showed that the university library books are stolen and mutila
library materials, financial constraint and selfishness on the pa
also discovered that various methods were adopted for stealin
library books which include: tearing of book page(s) off, remo
cover, hiding of books under their clothes and their pockets. S
were proffered to eradicate theft and mutilation in university
recommendations are: that University libraries should provid
enable the library users photocopy books that are few in the l
recommends that university management should provide ade
meet the information needs of their users.
