## CRIANÇA HOSPITALIZADA E O IMPACTO EMOCIONAL GERADO NOS PAIS

*Carine Marlene Schneider, Leticia Galery Medeiros*

### RESUMO

Esta pesquisa teve como temática a “Criança hospitalizada e o impacto emocional gerado nos pais.” Buscou-se verificar o impacto emocional dos pais causado pela hospitalização do filho; investigar as consequências e os sintomas emocionais apresentados pelos pais da criança que participam do processo de hospitalização; as estratégias utilizadas pelos pais no enfrentamento da hospitalização dos seus filhos, bem como, a importância da psicologia neste contexto. O procedimento de coleta de dados concedeu-se a partir de entrevista semiestruturada com o acompanhante da criança internada em um hospital do Extremo Oeste Catarinense. Para a análise dos dados utilizou-se o método de conteúdo, segundo o modelo de Bardin (2000). Participaram da pesquisa oito pais que acompanhavam seus filhos durante a internação. Nas entrevistas realizadas, surgiram nove categorias: acompanhamento, organização, mudança na rotina, sentimento em relação às mudanças, mudança no relacionamento com o filho e demais familiares, estratégias utilizadas para enfrentar a situação, atendimento hospitalar, sentimento de ausência de casa e a importância da psicologia na percepção dos pais. Assim pode-se observar que a hospitalização do filho causa um impacto emocional muito grande nos pais, como também mudanças nas suas rotinas, gerando angústias e sofrimento ao enfrentar a situação que surgiu de forma inesperada.

Palavras Chave: Criança hospitalizada. Impacto emocional. Pais. Rotina. Enfrentamento.
