From the forest to the sea: the ecology of wood in streams, rivers, estuaries, and oceans.

Author(s) : [Maser, C.](#) ; [Sedell, J. R.](#)

Book : [From the forest to the sea: the ecology of wood in streams, rivers, estuaries, and oceans](#)
1994 pp.xv + 200 pp.ref.20 pp. of

Abstract : This book discusses the role wood plays in very complex and diverse ecosystems. An introductory section considers some of the current actions of damming streams and rivers, which prevent driftwood reaching the sea. Part II describes the journey taken by water and wood from the mountains of the Pacific Northwest to the sea.

ocean, including discussion of the vital role of wood in each of streams, rivers and the open sea. The final section discusses the effects of settlement, whether the coast and progressed inland, on the waterways and ancient forests of the Northwest. A list of common and scientific names of plants and animals, glossary and index are included.
