Ethical Issues Related to Psychological Testing in Africa: What I Have Learned (So Far)

[Cheryl D. Foxcroft, University of Port Elizabeth, South Africa](#)

Publication Date

10-2011

Abstract

This article attempts to introduce readers to what I have learned about ethical issues related to psychological testing in Africa. The core ethical considerations of cultural and linguistic diversity so as to be sensitive to test-takers' beliefs and values during the testing process is highlighted. The ethical issues to consider and address before using tests in an assessment are discussed and presented. This is followed by a discussion on the ethical issues that a practitioner needs to deal with during and after testing. Three examples from the multicultural African context are provided to illustrate the ethical issues.
