**Introduction**

One of the most striking changes in the construction of medicine in the century has been the decline and fall of the use of water cure in the English-speaking world. It is a curious fact that the therapeutic waters of the world, which were formerly used in the treatment of a wide variety of ailments, and in the treatment of the most serious diseases, have almost entirely disappeared from the scene of medicine. The only remnants of the water cure are to be found in the treatment of the most serious diseases, and in the treatment of the most serious diseases, and in the treatment of the most serious diseases.
