SUMMARY

The Wind River Experimental Forest has been called the cradle of forestry in the Pacific Northwest, a place of groundbreaking discoveries in forest genetics and ecology. *Forest of Time* follows 100 years of forest science at Wind River, as social and scientific changes transformed the 20th century and the Pacific Northwest forest itself. It is a story of discovery and blindness, of opportunities taken and missed, in a forest dedicated to long-term research.

The Forest Service began research at Wind River in 1908 to learn the secrets of the giant Douglas fir. During the course of the century, generations of scientists studied the forest, and their conclusions changed through time. Initially, Wind River scientists saw the region in need of protection from fire and careless logging. They saw scorched

Introduction

pp. 1-13

 Download | Save

Chapter One: State of the Science in 1908

pp. 14-22

 Download | Save

Chapter Two: Early Science in the Douglas Fir Region

pp. 23-35

 Download | Save

Chapter Three: A Focus on Research

pp. 36-49

 Download | Save

Chapter Four: A Forest for the Long Term

pp. 50-67

 Download | Save

Chapter Five: A New Deal for Forest Science

pp. 68-86

 Download | Save

Chapter Six: Research Expands Following the Second World War

pp. 87-97

 Download | Save

Chapter Seven: Better Timber Faster

pp. 98-110

 Download | Save

Chapter Eight: Forest Science in Transition

pp. 111-123

 Download | Save

Chapter Nine: New Plans and New Restrictions

pp. 124-134

 Download | Save

Chapter Ten: Into the Canopy and Beyond

pp. 135-150

 Download | Save

Afterword: Looking into the 21st Century

pp. 151-154
