

Applying XP ideas formally: The story card and extreme X-machines.

Applying XP Ideas Formally: The Story Card and Extreme X-Machines

Thomson, C. and Holcombe, W. (2003) *Applying XP Ideas Formally: The Story Card and Extreme X-Machines*. In: 1st South-East European Workshop on Formal Methods. Agile Formal Methods: Practical, Rigorous Methods for a changing world, 21-23 November 2003, Thessaloniki, Greece.

Abstract

By gathering requirements on story cards extreme programming (XP) makes requirements collection easy. However it is less clear how the story cards are translated into a finished product. We propose that a formal specification method based on X-Machines can be used to direct this transition. Extreme X-Machines fit in to the XP method well, without large overheads in design and maintenance. We also investigate how such machines adapt to change in the story cards and propose how this could be further enhanced.
