Description

Title: Basque clitics in morphosyntax

Author(s): Ecay, Aaron

Subject(s): [Linguistics](#)

[Basque](#)

Abstract: This paper addresses the question of -feature marking in Basque. Basque finite verbs display an uncommonly large number of morphemes which covary with the -features of the absolutive, ergative, and dative arguments as well as (in some dialects) the gender of the

addressee. Recent work (Preminger 2009; Arregi & Nevins 2012) has addressed the question of how these morphemes are derived. In taking up this question, I conclude that there is a full complement of clitics (absolutive, dative, ergative, addressee), as well as an agreement probe which spells out the number of the absolutive.
