Abstract

This list of 410 books and 76 journals is intended as a selection guide to be used in a library supporting allied health educational programs or allied health personnel in either an academic or health care setting. Because of the impossibility of covering the large number and wide variety of allied health professions and occupations, the recommended publications are focused primarily on the educational programs listed and described in the AMA's *Allied Health and Rehabilitation Professions Education Directory*, plus physical therapy, dental allied health, medical secretarial,

nutrition, and speech pathology/audiology programs. Books and journals are categorized by subject; the book list is followed by an author/editor index, and the subject list of journals by an alphabetical title listing. Items suggested for initial purchase (163 books and 31 journals) are indicated by asterisks. To purchase the entire collection of books and journals (1996 subscriptions) would require an expenditure of about \$26,740. The cost of only the asterisked items totals \$11,160.
