– PRODUCT DESCRIPTION

BY GILBERT STRANG

-

2007 / xii + 713 pages / Hardcover / ISBN 978-0-961408-81-7 / Lis

Published by Wellesley-Cambridge Press. Distributed by SIAM.

“Gil Strang has given the discipline of computational science and engineering, and insightful books that are invaluable for students, teachers — William Briggs, Professor of Mathematics at University of Colorado

This book presents the full range of computational science and engineering for thousands of engineers and scientists. The book is solution-based and covers finite elements, Fourier analysis, optimization, and more.

See www-math.mit.edu/cse/ for full contents and video lectures.

About the Author

Gilbert Strang is a Professor of Mathematics at Massachusetts Institute of Technology. His research interests include linear algebra, wavelets and filter banks, and a monograph with George Fix titled *An Analysis of the Finite Element Method* in Mathematics from 2003–2004, and won the Neumann Medal of the

Contents

Chapter 1: Applied Linear Algebra

Chapter 2: A Framework for Applied Mathematics

Chapter 3: Boundary Value Problems

Chapter 4: Fourier Series and Integrals

Chapter 5: Analytic Functions

Chapter 6: Initial Value Problems

Chapter 7: Solving Large Systems

Chapter 8: Optimization and Minimum Principles.

ISBN: 9780961408817
