## *H.a. Welker and Pedagogical Lexicography*

*S Tarp*

### Abstract

The lexicographer Herbert Andreas Welker's book of more than 500 pages about pedagogical lexicography provides an overview of the various types of pedagogical dictionaries as well as the corresponding theoretical literature. The book is descriptive, with himself mainly an observer of lexicographical practice and a "collector" of — frequently expressed by a large number of scholars. This method allows the reader to become acquainted with a relevant literature on pedagogical lexicography which is presented in a systematic and condensed form that might perhaps not be so easily accessible to many readers. This review article provides a guided tour through this highly recommendable book and discusses some of the most important ideas reproduced in it.
