 **Principles of systematic zoology.**Author(s) : [Mayr, E.](#)Book : [Principles of systematic zoology.](#) 1969 pp.xi + 428 pp.

Abstract : The author of this book on the theory and principles of zoological nomenclature is a Professor of Zoology at Harvard University, a Director of the Museum of Comparative Zoology, and a Member of the International Commission on Zoological Nomenclature. The previous book, "Methods and Principles of Systematic Zoology", published in 1953 of which he was the senior author served as a model for the present work which is completely rewritten and expanded to incorporate new theories and theory. Because of its emphasis on the theoretical aspects of taxonomy and nomenclature of which it is the only comprehensive account available this book should be used by all teachers and students of systematic zoology. It concludes

chapter on the interpretation of the rules of nomenclature a comprehensive
a glossary and a subject index.-MGG.

Record Number : 19692203627
