Abstract: Historians have typically  
interpreted Mormon polygamy in  
nineteenth-century America  
through the lens of religious

doctrine. This study takes a cultural approach and examines polygamous practice during its formative period in the 1850s by looking closely at two families, the Hales and the Heywoods. Private diaries, letters, and other family papers were used to reconstruct their relationships and analysis sheds light on how they viewed the marriages. The lived experiences of these Mormon pioneers show that polygamy was experimental. Men and women drew on traditional marital values such as domesticity and romantic love when negotiating their atypical marriages.
