**Abstract** Democratization is a major political phenomenon of the current age. Democratization through the looking glass intellectual origins of the inquiry. How we see and understand it are influenced by what we 'bring to the table' from anthropology and economics, to sociology, law and area studies, this volume offers a rich combination of analyses. On one level the book provides anyone interested in democratization with a wide-ranging distillation of the main field. On a second level the book advances the case for a broadly-based comparative study which includes Europe, maintaining the belief that a multi-disciplinary approach enhances our understanding of democratization for students of politics willing to explore the boundaries of their subject and all social scientists who need an introduction.
