TNG publications 1989-2005

[W. Boschin](#)*(Submitted on 12 Apr 2006)*

This document lists a set of (refereed and unrefereed) scientific publications based on data taken with the instruments of the Italian Telescopio Nazionale Galileo (TNG, mainly from the year 2000 onward) and the technical papers describing the development of the TNG project from the "phase A" (late '80s) until the end of year 2005. The collection is compiled by searching for publications on the internet. In particular, the search engines of the NASA Astrophysics Data System and Google Scholar are used. This work represents the first attempt to probe the scientific production of the TNG and will be updated regularly from year to year. Comments and suggestions are welcome.
