## [Statistical methods for agricultural workers.](#)

Author(s) : [Panse, V. G.](#) ; [Sukhatme, P. V.](#)

Book : [Statistical methods for agricultural workers.](#) 1978 No.Ed.3 pp.xv + 347pp.

Abstract : The third edition of this standard text book has been revised by V. N. Amble. The book was originally published in 1954 [see PBA 26, p. 100] and enlarged in 1961. This edition has the same basic layout as the earlier editions. New sections have been added, particularly in Part I, dealing with statistical tests under significance tests and the chi 2 test and linkage estimation. The old test of Behrens, to test that two samples are drawn from populations having the same variance, has been replaced by the more commonly used test suggested by Cochran and

21, p. 220-221], while single-tailed and two-tailed tests and the exact test for contingency table with small frequencies are some of the items added. Changes have been made to the illustrative examples to take into account changes in yield due to the introduction of high-yielding crop varieties and changes in crop management since 1961, although older examples have been retained, as has the main aim of the book, namely to provide an introductory text in the use of statistics for agricultural research.

Record Number : 19811695218

Publisher : Indian Agricultural Research Council.

Location of publication : New Delhi

Country of publication : India

Language of text : English

Language of summary : English
