Abstract : Society has recently increased the value it places on the services that wetlands provide, including water quality improvement, flood control, wildlife habitat, and recreation. However, owners of wetlands are often unable to profit from these services.

benefits created are freely enjoyed by many. This report examines different public and private incentives regarding wetlands. Federal wetland policy has in recent decades moved from encouraging wetland conversion to encouraging wetland and restoration in an effort to balance public and private objectives. The report highlights the need for continued wetlands protection policies as the USA approaches its goal of "no net loss" of wetlands.
