Abstract

This article reviews the founding of *The Leadership Quarterly* (*LQ*) and the 188 articles published in its first decade. Multiple methods were used to prepare this review including interviews with former and current *LQ* editors; quantitative techniques; and qualitative analysis to examine the themes, methods, and contributions of the journal during its first decade. Directions for future research are provided, which integrate a decade of *LQ* author directives with interviews of prominent leadership scholars and the current authors' opinions grounded in the literature review.
