Author Affiliation : University of East Anglia, Norwich, Norfolk, UK.

Book : [Environmental economics: an elementary introduction.](#) 1994 pp.viii + 328p

Abstract : The subject of environmental economics is at the forefront of the current debate: the environment can no longer be viewed as an entity separate from the economy. This text analyses contemporary environmental issues from the perspective of economic effects and their consequences for human well-being. The book examines the economic importance of environmental degradation, analyses the economic impact of environmental degradation and points to the design of economic incentives to slow, halt, or reverse environmental degradation.

degradation. The text is aimed at the person with little or no economics background. The six parts of the book cover economics and the environment, the causes of environmental degradation, decision making and the environment, the economic control of the environment, natural resources, and environmental economics in action.
