Jewelry making -- Study and teaching (Secondary), Jewelry, Ta (Aesthetics)

DOI

10.15760/etd.5243

Abstract

This thesis deals with the development of a body of my own creative teaching of jewelry-working in the secondary schools. Emphasis is given to the use of the natural environment as a stimulus for creative philosophy of nature as art forms has been the focus of my work for several years. This led to the design and completion of jewelry projects in this study. Knowledge gained in my work experiences formed the background of the presentation of these skills to secondary students.
