[The anatomy of the laboratory mouse.](#)

Author(s) : [Cook, M.J.](#)

Book : [The anatomy of the laboratory mouse.](#) 1965 pp.v + 143 pp.

Abstract : Experimental techniques on rodents, carnivores, birds, ruminant monkeys are described. Collection of body fluids, infusion techniques, care during and after surgery, radiography, euthanasia and disposal, parasitic infestation free techniques, aerosol challenge and drug administration are covered in detail from basic techniques to refined special procedures. These subjects are approached from a very practical, as well as scientific angle, giving a number of hints useful and comprehensive to a technician commissioned to a new task as well as to a research director in charge of a variety of projects. Each chapter is accompanied by a list of references and generous illustrations are given by figures, photographs and

Author and subject indexes are given. A very useful reference book for any in animal experimentation.-A.S.

Record Number : 19662205073

Publisher : London (& New York): Academic Press.

Language of text : English

Language of summary : English

Indexing terms for this abstract:

Organism descriptor(s) : carnivores, monkeys, rodents, ruminants

Descriptor(s) : anatomy, animal anatomy, body fluids, euthanasia, indexes, infect parasitoses, photographs, radiography, surgery, techniques

Identifier(s) : body components, mercy killing, parasitic diseases, parasitic infesta parasitosis

Broader term(s) : mammals, vertebrates, Chordata, animals, eukaryotes, primate
