Abstract: Over the past few years, a series of Regional Supplements to the 1987 U.S. Army

Corp of Engineers (USACE) Wetland Delineation Manual have been published, and currently the National Wetland Plant List is being updated. To support these efforts, we generated a list of floras and field guides for each USACE region Alaska, Arid West, Atlantic and Gulf Coastal Plain, Caribbean, Eastern Mountains and Piedmont, Great Plains, Midwest, Northcentral and Northeast, Pacific Islands, and Western Mountains, Valleys and Coast. Each list includes regional floras, state floras, local floras, regional field guides, state field guides, and local field guides. We also prepared a list of floras and field guides that cover the entire U.S. This list is divided into the following categories: forbs, shrubs, trees, grasses and sedges, ferns, orchids, cacti and agave, and references and help guides. The flora and field guide lists can serve as tools for wetland delineation and restoration, assigning of wetland indicator statuses to vegetation species, and other vegetation activities.
