Abstract : Member States of the WHO committed in 2005 to develop their health systems so that all people have access to services and do not suffer financial hardship when paying for them. This goal was defined as universal coverage, sometimes called

health coverage. In striving for this goal, governments face three fundamer (1) How is such a health system to be financed? (2) How can they protect pe financial consequences of ill-health and paying for health services? (3) How encourage the optimum use of available resources? They must also ensure equitable and establish reliable means to monitor and evaluate progress. In WHO outlines how countries can modify their financing systems to move m towards universal coverage and to sustain those achievements. The report new research and lessons learnt from experience into a set of possible acti countries at all stages of development can consider and adapt to their own suggests ways the international community can support efforts in low-incor achieve universal coverage.
