Garden cities 21: creating a livable urban environment

Author(s) : [Simonds, J. O.](#)

Book : [Garden cities 21: creating a livable urban environment](#). 1994 pp.xv + 231p

Abstract : The book presents a positive approach to the creative evolution of the American city, offering practical and proven ideas on how to transform ailing cities. Crime, overcrowding, poverty, traffic problems and pollution are in full display. The book shows how a livable, urban and regional centres. Viewing the city as an organic entity, the book analyses each individual component and provides a conceptual model that reconnects its scattered elements into an efficient, more self-sustaining, 'garden city' prototype. The emphasis is on urban regeneration, the development of the

centres, cohesive communities, resource management, open space planning of parks that allow a city to breathe and improve the quality of life, and new systems. The proposed model portends a vastly superior city for the 21st century. Contributions to the model and innovative solutions are offered by landscape and urban designers.
