'Pataphysics: A Useless Guide

Hugill, Andrew

Subject: Pataphysics, 'Pataphysics, Jarry, Modernism, Scien

Citation: Hugill, A. (2012) 'Pataphysics: A Useless Guide. Ca

Abstract:

Of all the French cultural exports over the last 150 years or so, 'pataphysics--has proven to be one of the most successful. The concept, first introduced by the playwright Alfred Jarry and his schoolmates, resisting close understanding, 'pataphysics nevertheless lies around the root of many other key cultural developments of the twentieth century. Andrew Hugill offers an informed exposition of a rich and varied field, and the twin dangers of oversimplifying a serious subject and 'years' research, Hugill maps the 'pataphysical presence (perhaps unacknowledged) in literature, theater, music, the visual arts, and the influence in the social sciences and the sciences. He offers a range of sources, intercalated with a thorough explication of key theoretical concepts. He provides these in reverse chronological order, beginning backward to Jarry and beyond. He looks specifically at the work of Jarry, Ballard, Asger Jorn, Gilles Deleuze, Roger Shattuck, Jacques-Louis David, Miró, Max Ernst, Marcel Duchamp, James Joyce, Flann O'Br
