Manual of veterinary clinical pathology.

Author(s) : [COFFIN, D. L.](#)Book : [Manual of veterinary clinical pathology.](#) 1953 No.3rd. Edit. pp.xiv + 322 pp

Abstract : Books dealing adequately with Veterinary clinical pathology do not exist. It is a disappointment to find that the third edition of this book has only one section which was not present in the second edition. The author stated in the preface to the second edition, that the material had been chosen to be of help to "the practical veterinarian, the veterinary student, laboratory diagnosticians, veterinary pathologists, and research workers in animal problems". To produce such a book satisfactorily is difficult; to compress it into 302 pages is impossible.

The section on diagnosis of bacterial diseases is an example of the disaster which follows an attempt to write for too wide a public. Eighty-seven pages are

this section, but the worker with little knowledge of bacteriology would be an oversimplification, while the skilled bacteriologist finds the material so superficial of little use.

While the book is too elementary to be of much use to a laboratory worker, techniques described are too complicated to be suitable for the practising veterinarian. The author would be doing a great service to the profession if future editions were written for the laboratory man. The present edition could be simplified for the practitioner.

The new section: "Diagnostic interpretation in clinical chemistry" is well written and usefully enlarged in future editions.-G. B. S. HEATH.

Record Number : 19542200958

Publisher : London: Baillière, Tindall & Cox.

Language of text : English

Language of summary : English

Indexing terms for this abstract:

Organism descriptor(s) : man

Descriptor(s) : bacterial diseases, bacteriology, chemistry, clinical aspects, diagnostic workers, medicine, pathology, research workers, students, techniques, veterinarians

Identifier(s) : bacterial infections, bacterioses, bacterium, clinical picture, medical research personnel, researchers, veterinary surgeons, vets

Broader term(s) : Homo, Hominidae, primates, mammals, vertebrates, Chordata, eukaryotes
