Traditional phytotherapy of Danuwar tribes of Kamlakhonj in Sindhuli district, Nepal.

Author(s) : [Manandhar, N. P.](#)

Author Affiliation : National Herbarium & Botanical Laboratories, Godawari, Lalitpur

Journal article : [Fitoterapia](#) 1990 Vol.61 No.4 pp.325-331 ref.18

Abstract : A survey of medicinal plant use was conducted in 1984 and 1985 among 34 informants of tribal healers. Sixty species consistently reported as being effective (cited by 10 or more of the 34 informants) are listed, together with their local names and details of their uses and methods of administration. Many are forest trees. The survey identified

types of human and animal disorders treated; in addition, the bark and fruit: *spinosa* [*Randia* sp.] were used as fish poison and leaf juice of *Clerodendrum infortunatum*] was used as an insecticide.
