Abstract

Textile manufacturing is a major industrial production. It is based in the conversion of three types of fiber into yarn, then fabric, then textiles. A Technical textile is a textile product manufactured for non-aesthetic purposes, where function is the primary criterion. In this part Home textile is common & important part in technical textile. The new promise of technical textiles is generation of products that eventually have a direct impact upon all sorts of consumer textile markets, including both clothing and furnishings. These are called “Home-tech”. The home-tech segment of technical textiles comprises of the textile components used in house hold applications. Home Textile Product such as (i.e.: Towel,

Bedsread, Carpet, Curtain, Blanket, Nonwoven wipes. Mosquito net, Furniture fabric etc) are used in our domestic purpose. Cotton, Rayon, Silk, viscose, jute, Polyester, Linen, Bamboo etc are both used in produced Home Textile product. Plain, Twill, Sateen, Patterned, Dobby, Jacquard are mainly used in HomeTech weaving process. These parts of technical textile especially home textile are modern creation for comfort and decorative our living life. It makes our life easier and aristocrat.
