Abstract : The book is the product of a three-day conference on social and psychological factors in stress. The purpose of the conference was to identify crucial issues in this area of stress and to seek potential research approaches to those issues as the focus of the basic contract research program for the sponsor. The document gives a conceptual formulation for research on stress, major substantive and methodological issues, an integrative review of some research on social-psychological factors in stress, and a discussion of strategic considerations for future research on stress.
