Micro-analysis in medical biochemistry.

Author(s) : [WOOTTON, I. D. P.](#)Book : [Micro-analysis in medical biochemistry](#). 1964 No.4 pp.ix+ 254 pp.

Abstract : This fourth edition of "Micro-analysis in medical biochemistry" appeared 30 years after the death of Professor E. J. King who prepared its original edition (Abstract 1289, Vol. 16). A life of nearly twenty years and a foundation laid in the Medical School of the University of London have given the book its exceptional value. Those biochemists whose functions are to provide laboratory services for clinical departments find that many of the methods described are also suitable for application in research work. The chapters on animal nutrition, on the Technicon Autoanalyzer, and on the extension of methods of investigating enzymes in their different molecular forms, bring the coverage into line with the most recent developments.

techniques.-D. Harvey.

Record Number : 19651405102

Publisher : J. & A. Churchill Ltd., 104 Gloucester Place, London W.1

Language of text : English

Language of summary : English

Indexing terms for this abstract:

Organism descriptor(s) : man

Descriptor(s) : animal nutrition, enzymes, isoenzymes, services, techniques

Identifier(s) : Britain, isozymes, United Kingdom

Geographical Location(s) : UK

Broader term(s) : Homo, Hominidae, primates, mammals, vertebrates, Chordata, eukaryotes, British Isles, Western Europe, Europe, Commonwealth of Nations, De Countries, European Union Countries, OECD Countries
