 **Hawthorns and medlars.**

Author(s) : [Phipps, J. B.](#) ; [O'Kennon, R.](#) ; [Lance, R. W.](#)

Editors : [Phipps, J. B.](#); [O'Kennon, R.](#); [Lance, R. W.](#)

Book : [Hawthorns and medlars](#) 2003 pp.139 pp.

Abstract : This book focuses on the hawthorns (*Crataegus* spp.) and medlars (*Eduardus* spp.) of greatest interest to horticulturists, covering some 70 wild species and many highly worthy of cultivation, and many ornamental cultivars and hybrids. Part 1 covers the more general aspects, with chapters on: Hawthorns and medlars in folk history and conservation, structure and reproductive biology; Practical value (in medicine, ornament, pomology and turnery, agricultural husbandry and wild and erosion control; nuisance aspects); Cultivation; and Breeding and selection. Part 2 provides an account of the most important kinds (species, cultivars and hybrids).

ornamental horticulture. The centre section of the book comprises 75 colour plates. The appendices include a note on preparation of herbarium specimens, a check list of *Crataegus* and *Mespilus* species, and a tabular key to hawthorns and medlars.
