Book : [Internal parasites and animal production.](#) 1975 pp.53pp.

Abstract : The Management Committee of the New Zealand Society of Animal Production performed a valuable service when it organized a group to give advice on internal parasites in cattle and sheep. This booklet, a list of the Group's recommendations, was written for farmers and refers, of course, to problems in New Zealand, so British and other veterinary surgeons will get little from the preliminary sections of basic knowledge. However, all veterinary surgeons will agree with all the recommendations for control of internal parasites, but recognition by the Group that routine dosing is not effective is a refreshing change.

outlook. A similar booklet written for British farmers would be a boon.
