Highlights

- Thermal waters in Budapest
- Curative properties of thermal waters
- Chemical composition of thermal springs
- Treatment of pathologies with thermal waters
- Bathhouses in Budapest

Abstract

The physical and chemical, recreational and healing qualities of spring waters of the major spa resorts of Budapest are briefly reviewed. The key features of the Császár-Veli Bej, Danubius Health Spa, Margitsziget, Gellért, Király, Lukács, Rudas and Széchenyi Baths are illustrated. Expected benefits in the treatment of a number of illnesses are discussed with reference to the presence of specific inorganic substances.
