Abstract

'On January 7 1895, Frederic P Ott stood before the world's first movie camera and sneezed. But the droplets by Ott were too fast, too small or too many for the primitive camera to record. The sneeze recorded here is the one that did not see'. Commissioned following a call by Bookworks for the New Writing Series edited by Jane Rolo and Co-authored with British author Lawrence Norfolk (acclaimed for his novels of historical fiction - Somerset Literature 1992), it followed earlier collaboration into the area of knowledge and genetics (*Inheritance Hotel* - 1999, *I Need to Know*, Artlab5, Imperial College, London 2001). The historical artifact of Thomas Edison's film piece of copyrighted moving image ever recorded, is at the heart of the concept. The books' historically referenced alongside the actual images of a one second sneeze filmed using laser-imaging equipment at Oxford Lasers, and the original film, are used to explore the development of technology between the chemical and digital imaging, as a conceptual engagement with time and its mediation through the form of the book as a work in itself. A re-making is included in the Afterword.

Item Type:	Book
ISBN:	1870699521
