Photometric nin-hydrin method for use in the ehromatography of amino acids.

Author(s) : [MOORE, S.](#) ; [STEIN, W. H.](#)

Author Affiliation : Labs. Rockefeller Inst. Med. Res., New York.

Journal article : [Journal of Biological Chemistry](#) 1948 Vol.176 pp.367-388

Abstract : 2. Successive fractions were analysed by the sensitive ninhydrin whose quantitative use with a wide variety of amino-acids, peptides and other is described. Hydrolysates of β -lactoglobulin and of bovine serum albumin were analysed and the results compared with data of other authors. The method was capable of giving accurate results with a few mg. of protein. R. L. M. Syngé.

ISSN : 0021-9258

Record Number : 19481405468

Language of text : not specified

Language of summary : not specified

Indexing terms for this abstract:

Organism descriptor(s) : cattle

Descriptor(s) : albumins, amino acids, beta-lactoglobulin, blood chemistry, blood serum albumin, hydrolysates, methodology, peptides, photometry, techniques

Identifier(s) : methods

Broader term(s) : Bos, Bovidae, ruminants, Artiodactyla, mammals, vertebrates, C animals, eukaryotes
