pp.xiii + 316 pp. ref.at ends of chapters

Abstract : This book includes revised versions of papers presented at a workshop on the future of food: biotechnology markets and policies in an international setting.

"Agricultural Biotechnology: Markets and Policies in an International Setting"
Adelaide, Australia on 22 January 2001. The chapters in this book confront the
controversy over biotechnology with new analyses and insights from economic
technologists. The topics covered include the differences in perceptions about
biotechnology among rich and poor countries; the effects of rich-country restrictions on
international trade in genetically modified crops on the welfare of poorer countries;
effects of intellectual property rights on the bioscience done by public agencies
abroad; and the economic impacts of biotechnology.
