## Retrospects and prospects of the rice economy of Bangladesh

Author(s) : [Ahmed, R.](#)

Author Affiliation : International Food Policy Research Inst., 2033 K St NW, Washington, DC 20006-1002, USA.

Book : [Retrospects and prospects of the rice economy of Bangladesh](#) 2001 pp.

Abstract : The progress in rice production in Bangladesh during the last 20 years is described and the prospects until 2010 are examined. Lagging districts and high rice productivity are identified and public policies pertaining to rice production are reviewed. Total factor productivity of rice is determined and the effects of rice trade liberalization are assessed. It is shown that the achievements have been significant.

uneven, with robust progress in the north-western districts and a nearly stable situation in north-eastern, central, low lying, and coastal districts of the country. This has mainly been based on seed-fertilizer-irrigation technology. It is expected to continue to play a dominant role in the agricultural economy. Declining population and a continuation of technological diffusion may give Bangladesh an export advantage by 2010. Recommendations for policy and institutional changes are provided.
