Cactus and succulent plants: status survey and conservation action plan.

Author(s) : [Oldfield, S.](#)

Book : [Cactus and succulent plants: status survey and conservation action plan.](#)

212 pp. ref.11 pp. of

Abstract : This plan consists of 4 chapters and a series of annexes that provide information on the current status of cactus and succulent populations worldwide. The first chapter contains accounts of each of 8 plant families written by specialists, including their distribution, diversity, threats and status. This is followed by a chapter that discusses the conservation measures available with information on legislative measures.

trade, and *in situ* and *ex situ* conservation activities. Chapter 3 consists of records and accounts examining current threats and specific conservation status and action plans. The final chapter details 108 action proposals that must be taken to conserve succulent diversity. These include general proposals and those that are taxonomically and regionally specific. An extensive bibliography provides a comprehensive resource for a large group of plants.
