Working dogs of the world.

Author(s) : [HUBBARD, C. L. B.](#)

Book : [Working dogs of the world.](#) 1947 pp.vii +240 pp.

Abstract : THIS book presents a most comprehensive survey of the numerous dog breeds used for herding, haulage, and other types of work, as distinct from any dog used for hunting or "sporting" dog. The majority of the breeds described will be quite unknown to the British reader and the photographic illustrations are therefore particularly valuable. All breeds mentioned are illustrated, however, and as there is no index of illustrations, reference to the relevant photograph is not always given with the descriptive text. The breed, it is often difficult to discover whether a particular breed is illustrated. The descriptive particulars reveal that there is a pronounced similarity in build and appearance between dogs used for similar purposes in different countries.

a distinct resemblance between the Working Collies and Welsh Sheepdogs Groenendael of Belgium, and the German Shepherd Dog; and between the Bearded Collie, the Old English Sheepdog, the French Briard, and the Russia From the latter it is not a far cry to the heavy-coated types like the Hungaria Komodor, with coats reminiscent of the Corded Poodle. A different type of s heavier build and including more guarding and less herding among its dutie exemplified by the Rumanian Sheepdog, the Swiss Appenzell, and the Italian which are closely related to the heavy breeds used for draft and other purp the Leonburg, the Newfoundland, and the St Bernard.

The inclusion of the Kerry Blue Terrier as a herding dog will astonish most f breed, and admirers of the Pembroke Welsh Corgi will be surprised to find i Swedish counterpart in the Vallhund.

Some confusion would have been avoided had the description of the Worki entirely separated from that of the show type, which latter has, in any case, be included in a book on working dogs. A better claim could be advanced or some of the outstanding guard-dog breeds, such as the Bullmastiff and the Terrier.

The interesting Portuguese Water Dog (the action-photographs of which do appreciation) and the almost extinct Truffle Dog, owe so much to their mani an'cestry that it seems an omission not to have included the Poodle as a wc although it was, of course, originally a gundog, being derived from that extir ill-defined breed, the Water Spaniel.

Despite the author's addiction to the use of the word " cynological " the boc rank as a scientific treatise, and the author's prejudices are but thinly veiled nevertheless it is an invaluable reference book and one which is to be partic welcomed as focussing attention on the valuable services performed by so of dog, bred and selected for performance rather than appearance. M. BUR
