Book

Description

Education in the health professions is placing greater emphasis on team-based learning—learning that requires applying knowledge to a real-world context that teaches students to engage in the kind of collaborative learning that is required in today's clinical practice.

Team-Based Learning (TBL) is a strategy that accomplishes the goal of

This book is an introduction to TBL for health professions education. The theory, structure, and process of TBL, explains how solving and critical thinking skills, aligns with the goals of courses, improves knowledge retention and application as professional practitioners. The book provides ready guidance on everything they need to know about team maintenance; peer feedback and evaluation processes

The book includes chapters in which instructors describe their courses. The examples range across undergraduate basic and clinical sciences courses in medical, sports medicine education, residencies, and graduate nursing programs with a review and critique of the current scholarship on these professions, and charts the needs for future research.
