The new complete guide to beekeeping.

Author(s) : [Morse, R. A.](#)

Book : [The new complete guide to beekeeping.](#) 1994 pp.208 pp.

Abstract : This book is a revised, expanded version of the author's *Complete beekeeping* (4th edition, 1986). It forms an easily read guide to beekeeping for beekeepers, including beginners, whose main aim is to produce honey. It has a North American emphasis, and includes a chapter on organizations and other information in the USA, and a chapter on the impact of Africanized honey bees in the Americas. Other chapters deal with hives and equipment, seasonal management and diseases, honey plants, pollination, honey bee biology, and special techniques such as beeswax production, queen rearing, comb honey production, migratory beekeeping. A glossary and a subject index are also included.
