### The Tourist Experience in Boston American History, Middle-Class the Development of Urban Touri

[Hillary Corbett, University of Massachusetts Boston](#)

#### Date of Completion

5-19-2003

#### Degree Name

Master of Arts (MA)

#### First Advisor

Ann Holder

#### Second Advisor

Judith Smith

#### Abstract

This project analyzes a selection of representative guidebooks and 1910, to illustrate the development of a tourist industry in

how the changing nature of the city influenced a similar change. It also provides the necessary context in which to place this narrative. Two key elements essential to understanding the relevance of the city's experiences with the national phenomena of electrification in the mid- to late-nineteenth century, and Boston's distinctive nineteenth century America's developing national identity and history. In the pages of Boston guidebooks during this time period can be seen as providing a new way of viewing Boston's history—the writers of these guidebooks are writing for people who they knew it to us, visitors not from another place, but from a place where they think is important to know about Boston, and their descriptions of the city as well as hint at underlying social tensions and the progress of the city. Readers of this project, then, can experience Boston in the early twentieth centuries as tourists themselves, and thus gain a perspective on that experience is essential to understanding urban tourism's role in the development of the American city.
