Contemporary Debates in Cognitive Science

Robert J. Stainton (ed.)

Wiley-Blackwell (2006)

Authors

Robert Stainton
Western University

Abstract

This volume introduces central issues in cognitive science by means of debates on key questions. The debates are written by renowned experts in the field. The debates cover the middle ground as well as the extremes. Addresses topics such as the amount of innate knowledge, bounded rationality and the role of perception in action. Provides valuable overview of the field in a clear and easily comprehensible form.
